This is a great start but there is a huge amount still to do.

DM is not-for-profit but must be self-funding. Your support is essential for the continued growth of DM.

Please consider:

Becoming a web subscriber

(http://www.datametallogenica.com/dm_frames.asp?framefile=new_subscribers.htm), or

Becoming a sponsor (http://www.datametallogenica.com/dm_frames.asp?framefile=new_sponsors.htm).

Apart from providing the necessary financial support for continued growth, your involvement will give you and your colleagues unlimited access from virtually anywhere in the world to a great and growing unique database of continuous value.

The primary objectives of *Data Metallogenica* are to be:

- A primary web portal for "high-level" information on global ore deposits.
- An information source and rock reference base for experienced geologists, analysts and regulators.
- A training resource for younger geologists in companies.
- An education and research resource for students and teachers at universities.
- A permanent and easily accessible repository of much "fragile" and transient data held by individuals and companies – an ultimate world encyclopaedia of mineral deposits.
- A fast integrated link to detailed and supporting quality data sets elsewhere, including commercial providers, government surveys and university research groups.

We would welcome your support in becoming part of this great enterprise. The cost is surprisingly low at about \$1 – 2 per week per geoscientist. Please circulate this email to your colleagues and friends.

Kind regards

Dr Alan Goode
